About Career Discovery...

Online networking event with students and global companies

- Who are the active global companies in Japan?
- What are the talents and skills required at global companies?

Please visit the participating companies' online booths (breakout rooms) and ask questions freely.

* IMPORTANT : The purpose of the event is to improve students' understanding of global companies and to expand your career options, and is not aimed at job placement. JETRO have asked participating companies to refrain from giving information related to recruitment activities (eg. recruitment terms), nor conduct recruiting interviews during the event.
