Nagoya University Interdisciplinary Frontier Fellowship Q&A

Fellowship Program Overall

Q1001	Do the evaluators differ depending on the application field?
	Are there different evaluators for Materials, Quantum Science, and Information and AI?
A	The evaluators differ depending on the application field. Evaluations are conducted by subcommittees established in each field.
	Each subcommittee consists of one member from each of the graduate schools to which applications can be submitted in each field. The chairperson and vice chairperson of each subcommittee are appointed and decided on by the Director of the Doctoral Education Consortium.
Q1002	Working students are not eligible to apply. The definition of working members of society includes stay-at-home mothers, stay-at-home fathers, and individuals who have graduated from an undergraduate or master's program, have become a working member of society once, and have newly enrolled or been admitted to a doctoral course. In the School of Health Sciences, most students enroll in a doctoral course after gaining several years of clinical experience after completing an undergraduate or master's program. Moreover, most of the students of nursing courses are women, and many of them go on to the doctoral course after first giving birth and becoming a stay-at-home mother in their 20s. Despite the fact that the Japan Society for the Promotion of Science's Research Fellowship for Young Scientists recipient and age limit restrictions were abolished, limiting the scope of this fellowship to those in their 20s still seems to be somewhat of a problem. Under the current system, many students who need financial support in the Graduate School of Medicine's Health Sciences course are not eligible for the program. We would appreciate it if you could take this into consideration in your recruitment next year
A	onwards. The university is aware of the points stated, and in designing this program, we have
	requested the Ministry of Education, Culture, Sports, Science and Technology (MEXT), the source of the grant, to allow more students to apply for the program. MEXT's response was that the basic rules cannot be changed because the organizations selected for this fellowship program were determined according to the open recruitment guidelines indicated by MEXT. We would like to share this opinion with the person in charge at MEXT and will request an expansion of those who may apply starting in AY2023.
Q1003	Who conducts the evaluations?
A	Members of a committee selected from the university conduct the evaluations. The representatives of the graduate schools marked with a "〇" in the Appended Table 2 are confirmed members of this committee and will conduct a fair selection process.
Q1004	When will the seminars in Appended Table 1 finally be open?
A	They will be published after approval by the Fellowship Implementation Committee (early April).

Q1005	This program requires interdisciplinary research with different fields. Should the content of the research be reconsidered in this way?
А	There is no need to reconsider the research. Please prepare your application based on how you will develop the research in the Doctoral Course.
	Does "an individual who has become a working member of society once, and has newly enrolled or been admitted to a doctoral course" mean that those who have work experience are not eligible to apply regardless of their current employment status?
A	Such individuals are not qualified to apply this year. (Response from the Ministry of Education, Culture, Sports, Science and Technology)
Q1007	How much time is needed to attend lectures, training, seminars, etc.?
A	If WISE programs and other graduate schools offer lectures or training that can be substituted, we will configure the program so that students will not be overburdened, including considering point substitution.
Q1008	Will this program continue in 2023 and beyond?
A	The Ministry of Education, Culture, Sports, Science and Technology has a support period of seven years. This program will continue during that period. The University aims to continue beyond that period if possible.
	If a fellowship applicant is accepted as a recipient of the Japan Society for the Promotion of Science's Research Fellowship for Young Scientists and declines or withdraws from the Interdisciplinary Frontier Fellowship, is there any possibility of additional acceptance into the program?
A	We are considering a system to fill the program's capacity if there is a vacancy due to an applicant declining or withdrawing from a spot. An applicant not accepted initially will be accepted as a fellow in a vacant spot, and support will be available for the remaining period of the applicant who declined or withdrew. Regarding recruitment for AY2022, we plan to accept several people in October.
Q1010	I will be a second year master's student starting in April this year. I haven't taken the Doctoral Course entrance examination yet. Can I still apply for a fellowship?
A	Applicants who wish to enroll or be admitted to the Doctoral Course can apply. If you are accepted as a Fellow but do not enroll or are not admitted into the Doctoral Course (including failures), at that point you will lose your fellowship or prospective fellowship status.
Q1011	If a student is accepted as a recipient of the Japan Society for the Promotion of Science's Research Fellowship for Young Scientists after passing for the fellowship and declines or withdraws from fellowship support, are their various obligations regarding the fellowship also cancelled?
A	Although the student's obligations regarding the fellowship will be cancelled due to their focusing on work as a recipient of the Japan Society for the Promotion of Science's Research Fellowship for Young Scientists, we do ask for your cooperation in providing information on your career path in the form of follow-up in the future.
Q1012	If a leave of absence is decided after passing, can the grant period be extended?
A	It depends on the reason for the leave of absence, but an extension is difficult if due to personal reasons. We are currently considering such reasons as childbirth, childcare, or sudden injury or illness for taking measures such as temporary halt of the fellowship.

Application

Q2001	Is there any possibility the four fields will change in the future?
A	These are fields set by the Ministry of Education, Culture, Sports, Science and
A	Technology and will not be changed during the grant period. At the time of application,
	the University designed its application to allow students from all graduate schools to
	apply for the fellowship. A student can apply for at least one field.
02002	I know first-year Pre-Doctoral Master's Course students can apply, but is it possible for
Q2002	students who are unsure of whether to advance to the Doctoral Course to apply? And
	what about students who wish to enroll from other universities?
Α	A student can apply if they wish to enroll or be admitted at the time of application. The
	student can decline or withdraw later. Students from other universities may also apply. In
	the future, we will consider more effective ways to inform students who wish to enter or
	be admitted to the University from other universities. We ask for your cooperation in
	making this fellowship program widely known in your graduate school.
Q2003	I will be withdrawing from the Doctoral Course at University A and enrolling in the first
	year of the Doctoral Course at Nagoya University starting in April. Is it possible to apply
	for a fellowship in this case?
А	Since you are scheduled to enter the Doctoral Course at our university in April 2021, you
	have met the basic conditions. Other requirements must also be met, such as age, non-
	working student status, and not being a recipient of the Japan Society for the Promotion
	of Science's Research Fellowship for Young Scientists (DC1).
Q2004	Is it possible for a medical school graduate who obtained an initial clinical residency (2
	years), enrolled in the Doctoral Course in Medicine, currently belongs to a basic research
	department, and is conducting research while receiving a private scholarship to apply?
A	- It is possible to apply if the following conditions are met.
	1) The individual became a second year student of the Doctoral Course in Medicine in
	October 2020, or the student will become a second year student of the Doctoral Course
	in Medicine in April 2021
	2) The individual has no regular income
4	
	3) The individual is under 33 years of age as of April 1, 2021
	4) The individual does not violate the conditions of the current prohibition of dual payment
Q2005	4) The individual does not violate the conditions of the current prohibition of dual payment
Q2005	 4) The individual does not violate the conditions of the current prohibition of dual payment of private scholarships. What should a first-year international student enrolled in the Doctoral Course in April 2021 do if they are unable to come to Japan due to immigration restrictions as a result of
	 4) The individual does not violate the conditions of the current prohibition of dual payment of private scholarships. What should a first-year international student enrolled in the Doctoral Course in April 2021 do if they are unable to come to Japan due to immigration restrictions as a result of COVID-19 and have no information on their Nagoya University ID?
Q2005 A	 4) The individual does not violate the conditions of the current prohibition of dual payment of private scholarships. What should a first-year international student enrolled in the Doctoral Course in April 2021 do if they are unable to come to Japan due to immigration restrictions as a result of COVID-19 and have no information on their Nagoya University ID? The basic steps are as follows.
	 4) The individual does not violate the conditions of the current prohibition of dual payment of private scholarships. What should a first-year international student enrolled in the Doctoral Course in April 2021 do if they are unable to come to Japan due to immigration restrictions as a result of COVID-19 and have no information on their Nagoya University ID? The basic steps are as follows. 1. If enrolled = > Register using the internal applicant form
	 4) The individual does not violate the conditions of the current prohibition of dual payment of private scholarships.  1 will be enrolled in the Doctoral Course in the Graduate School of starting in April 2021. After completing a master's course in March 2019, I became a working member of society, then quit and enrolled in a doctoral program. In this case, am I considered a working student? A Yes, you are considered a working student. An individual who has graduated from an undergraduate or master's program, has become a working member of society once, has newly enrolled in a doctoral course is considered a working student. Regarding applications to the Interdisciplinary Frontier Fellowship, is this program no applicable to 2nd year graduate students of the Doctoral Course in April 2021? A Individuals who become D2 in April 2021 are not eligible for this fellowship program. This program is supported by a grant from the Ministry of Education, Culture, Sports, Science and Technology, and the requirements for eligible students enrolled in the 1st y of a Doctoral Course In April 2021. 	and

	in
of a Doctoral Course In April 2021.	ear
2010 A recipient of the Japan Society for the Promotion of Science's Research Fellowship	
Young Scientists application is mandatory, but what happens if an individual is acception both other for the follower based on the provide the follower based on the provide the provided of t	ed
by both the fellowship and the Research Fellowship for Young Scientists?	1
A For example, if you apply for a fellowship in the current academic year (2021), you wi have to withdraw from the fellowship when the application is accepted in April of the r	
year (2022).	σλί
2011 I am a second year international graduate student at Nagoya University. I plan to finis	h in
September of this year and be admitted in October. I receive a Monbukagakusho	
scholarship for graduate school. Can I still apply to the fellowship?	
A Yes, you can apply. However, if you receive a Monbukagakusho scholarship when yo	u
enroll or are admitted to the Doctoral Course in October 2021, you will not be able to	
become a Fellow. In addition, if you are currently receiving such a scholarship on the	
condition that you return to your home country after completing the Pre-Doctoral Mas	er's
Course, you will not be able to become a Fellow.	
22012 Can I write about my research plan in English?	
A Yes, the research plan can be written in English.	
22013 In the case of an applicant of foreign nationality (planning to apply in English), can the	•
use a recommendation letter from my supervisor written in Japanese? Or should it be	
written in English?	
A Applications and recommendations can be written in either English or Japanese.	
2014 Is it possible to change the field of application that I registered in my pre-application a later date?	ta
A If you would like to change the field of application of your pre-application registration,	
please contact us by the pre-application registration deadline. We will not accept any	
changes after the deadline.	
22015 What happens to international students who are unable to travel abroad?	
A Such students can apply. Internal and external applicant status is determined by whe	
or not a student has a Nagoya University ID. If you have a Nagoya University ID, plea	
apply as an internal applicant. If you have a Nagoya University ID but cannot enter N	JCT
for some problem, please use the inquiry form.	
22016 For recommendations, is it better to ask an instructor who knows me well to write the	
recommendation, or should I ask an instructor who I will learn under in the future?A Either will do. Since this is something that must be requested, please request it from	an
instructor, etc. who you feel comfortable requesting the recommendation from. You c	
also ask an instructor from outside the university. There are no evaluation criteria for	
writes the recommendation.	0
writes the recommendation.	

Q2017	When the evaluators examine an application, is the application form printed in color? Or is it printed in black and white?
А	The evaluation will be conducted using the PDF file. Do not insert any videos, etc.
Q2018	I know I can only apply to one field, but may I obtain an application number for multiple fields in the pre-application process?
A	Please apply to only one field at the pre-application registration stage. If you submit multiple applications by mistake, please contact us using the inquiry form immediately.
Q2019	Is there minimum criteria for applying (such as international conferences, papers)?
A	We do not ask for experience with international conferences, papers, etc. at the time of application.
Q2020	How much experience do I need to pass the application evaluation?
A	There are no special criteria set. Applicants are evaluated based on their motivation and potential. Applications are reviewed in the 1st screening and final decisions are made in the interview in the 2nd screening (presentation).
Q2021	How much time is given for the presentation in the interview and the Q&A session?
A	This is currently under consideration. In general, 20 to 25 minutes are given per student, including the presentation and Q&A time. More details will be given to those who successfully pass the 1st screening (around the middle of May).
Q2022	Do I need to prepare a PPT for the 2nd screening (interview)?
A	This is currently under consideration. We will let you know as soon as we decide.
Q2023	I have an academic conference around the time of the 2nd screening (interview). Will you consider individual circumstances in cases like this?
A	Unfortunately, we cannot handle any schedule adjustments. Please prioritize the fellowship interview.
Q2024	Is the 2nd screening (interview) face-to-face or online?
A	A final decision has not yet been made, but it is expected to be online. We will provide more details by the middle of May.

Grants and research expenses

Young Scientists (DC) If the three cases above do not apply, you will be asked to explain the outline of this program to your part-time research job and check whether it can be paid together with the fellowship grant.		is and research expenses
 grants. Q3002 Is it possible to also receive a Japan Student Services Organization (JASSO) scholarship for international students? A Yes, it is possible to also receive academic scholarships. Q3003 Is it possible to also receive scholarships from both local governments and private organizations? A For cases regarding individual scholarships, please provide an outline of the program to the department in charge of each scholarship and confirm the details for each scholarship. If unable to receive both, you will have to choose which grant system to receive. Q3004 If I receive a fellowship, is it possible to work part-time at a company? I am currently working part-time in research long-term in my field of specialization and would like to continue working next year. A This fellowship (¥160,000 per month (miscellaneous income)) is not available in the following three cases. 1. International student receiving scholarships via the Monbukagakusho Scholarship 2. International student receiving scholarships from their home country 3. Recipient of the Japan Society for the Promotion of Science's Research Fellowship for Young Scientists (DC) If the three cases above do not apply, you will be asked to explain the outline of this program to your part-time research job and check whether it can be paid together with the fellowship grant. In addition, when you become a Fellow, you will be required to perform research activities in your current graduate school, complete research activities at your part-time job, and fulfill your obligations as a Fellow in a balanced manner. Q3005 If I am accepted, when will I begin to receive the grant? Also, if it is paid in June, will the amounts for April and May be paid together? 	Q3001

Recipient of the Japan Society for the Promotion of Science's Research Fellowship for Young Scientists (DC) If the three cases above do not apply, you will be asked to explain the outline of this program to your part-time research job and check whether it can be paid together with the fellowship grant. In addition, when you become a Fellow, you will be required to perform research activities in your current graduate school, complete research activities at your part-time job, and fulfill your obligations as a Fellow in a balanced manner. Q3005 If I am accepted, when will I begin to receive the grant? Also, if it is paid in June, will the amounts for April and May be paid together? 	Q3002	
 organizations? A For cases regarding individual scholarships, please provide an outline of the program to the department in charge of each scholarship and confirm the details for each scholarship. If unable to receive both, you will have to choose which grant system to receive. Q3004 If I receive a fellowship, is it possible to work part-time at a company? I am currently working part-time in research long-term in my field of specialization and would like to continue working next year. A This fellowship (¥160,000 per month (miscellaneous income)) is not available in the following three cases. 1. International student receiving scholarships via the Monbukagakusho Scholarship 2. International student receiving scholarships from their home country 3. Recipient of the Japan Society for the Promotion of Science's Research Fellowship for Young Scientists (DC) If the three cases above do not apply, you will be asked to explain the outline of this program to your part-time research job and check whether it can be paid together with the fellowship grant. Also, if it is paid in June, will the amounts for April and May be paid together?		In addition, when you become a Fellow, you will be required to perform research activities in your current graduate school, complete research activities at your part-time job, and fulfill your obligations as a Fellow in a balanced manner.
A The grant for three months will be paid at the end of June.		Also, if it is paid in June, will the amounts for April and May be paid together?
	A	The grant for three months will be paid at the end of June.

Use of the grant, taxes, etc.

Q4000	How should fellowship research expenses be managed?
A	Research expenses will not be directly transferred to the Fellow. They are instead managed by Nagoya University. For the use of the research expenses, please follow the accounting procedures of the University.
Q4001	How are research expenses managed that could not be used during the year?
A	Unused expenses are returned to the government. The use of research expenses allocated for each year covers the completed delivery by the end of the year. For any delivery exceeding the fiscal year, please use the research expenses for the following year.
Q4002	Is it okay to use research expenses for multi-year purchases of software, etc.?
A	Research expenses cannot be used for purchases lasting multiple years. When purchasing, please purchase within the period of the year concerned. If a process extends for a period beyond a single year, research expenses can be disbursed only for that year.
Q4003	How is my social insurance and pension handled?
A	As there is no employment relationship between Fellowship students and Nagoya University, fellows are requested to enroll themselves.
Q4004	I have a question about the support grant. Is the support grant considered a form of salary? Do I have to pay residence tax and insurance premiums?
A	According to tax laws, it is not a salary but a miscellaneous income. As a general rule, a tax return is necessary. If you are currently enrolled in social insurance as a dependent of your parents, you may be excluded from your parent's social insurance. If so, follow the necessary procedures to enroll in social insurance yourself. Because the University reports the payment information of the fellowship grant to the municipalities of your certificate of residence. Those who have received the fellowship grant beginning in April 2021 may be subject to a residence tax starting in June 2022.

Other

Q5000	Is it possible to substitute the obligations of fellowship students in the field with similar training and seminars conducted in the graduate school?
A	In principle, fellowship students are required to take various lectures, training, seminars, etc., which are required and required electives as indicated in each field. However, if the training and seminars, etc. provided by each graduate school or WISE program lead to the improvement of research capabilities and connect to career path development—the aims of this fellowship program—the implementation committee and subcommittee will discuss and consider granting permission for substitution.
Q5001	Working students are not eligible to apply. The definition of working members of society includes stay-at-home mothers, stay-at-home fathers, and individuals who have graduated from an undergraduate or master's program, have become a working member of society once, and have newly enrolled or been admitted to a doctoral course. In the School of Health Sciences, most students enroll in a doctoral course after gaining several years of clinical experience after completing an undergraduate or master's program. Moreover, most of the students of nursing courses are women, and many of them go on to the doctoral course after first giving birth and becoming a stay-at-home mother in their 20s. Despite the fact that the Japan Society for the Promotion of Science's Research Fellowship for Young Scientists recipient and age limit restrictions were abolished, limiting the scope of this fellowship to those in their 20s still seems to be somewhat of a problem. Under the current system, many students who need financial support in the Graduate School of Medicine's Health Sciences course are not eligible for the program. We would appreciate it if you could take this into consideration in your recruitment next year
A	onwards. The university is aware of the points stated, and in designing this program, we have requested the Ministry of Education, Culture, Sports, Science and Technology (MEXT), the source of the grant, to allow more students to apply for the program. MEXT's response was that the basic rules cannot be changed because the selected organizations for this fellowship program were determined according to the open recruitment guidelines indicated by MEXT. We would like to share this opinion with the person in charge at MEXT and will request an expansion of those who may apply starting in AY2023.
Q5002	If I take a leave of absence from school and do volunteer work, is this considered work experience?
A	Taking a leave of absence during the enrollment and enrolling or admission to the Doctoral Course on returning to school is different from becoming a working member of society after graduation. Therefore, you can apply if you enroll or are admitted immediately after taking a leave of absence.
