

DII Program

'Solution Design Phase' SEMINAR

Date: 13:00-14:15 May 20 (Fri.), 2022

Place: ES Conference Room (ES Building 1F) NAGOYA Univ.

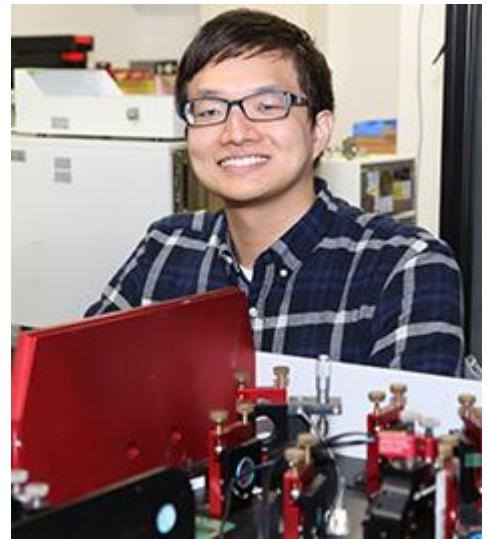

Title : Don't think twice about your future path, choose a more enjoyable one!

Lecturer: Dr. Ryohei Terabayashi (Assistant Professor, Department of Nuclear Engineering and Management, School of Engineering, The University of Tokyo)

Language: English

Abstract:

As a student, you learn many things now. Some of you may have concerns regarding your future path or career after acquiring a Ph.D. degree. A few years ago, I had a similar conflict as a Ph.D. student as well and finally, I chose the pathway as an academic researcher at the University. Here I will share my experience in choosing my future path as well as the impressions I got from communication with some students. I hope this talk will encourage you and help your decision-making regarding your future pathway. The only thing I can advise you, "Don't think twice about your future, just choose a more enjoyable one!"

BIO:

Young researcher specializing in radioisotope/trace isotope analysis based on laser spectroscopy and advanced laser as well as radiation measurement.

2017: Master of Engineering, Dept. of Quantum Engineering, Nagoya University, Japan

2019: Ph.D. of Engineering, Dept. of Energy Engineering, Nagoya University, Japan

Alumni of the PhD Professional: Gateway to Success in Frontier Asia (PHD Toryumon), leading graduate school program

2019-2020: Designated Assistant Professor, DII program, Nagoya University, Japan

2021-: Assistant Professor, Graduate School of Engineering, University of Tokyo
