

DII Program

'Solution Design Phase' SEMINAR

Date : 13:00-14:30 November 9 (Wed.), 2022

Place : 014 Lecture Room, IB Building, Nagoya University

Title : The Latest Activity of NASA

Lecturer : Mr. Garvey McIntosh (NASA Asia Representative,
U.S. Embassy in Tokyo)

Language : English

Abstract:

We are truly living in the Golden Age of space exploration. As government agencies like NASA continue to explore the universe with bold and cutting-edge human and robotic missions, we have seen an explosion of cooperation between the United States and Japan that include both international and commercial partners. During this

presentation, Garvey will provide an overview of past and ongoing plans for the exploration of outer space and outline how NASA plans to use lessons learned to return humans to the Moon and eventually onto Mars through the Artemis program.

BIO:

Garvey McIntosh currently the NASA Asia Representative based at the U.S. Embassy in Tokyo. In this capacity, he is responsible for NASA's programs and interest in Japan and other countries in the Asia – Pacific Region. Since joining NASA in the Office of International and Interagency Relations (OIIR) almost 14 years ago, he has supported international cooperation on the Space Shuttle and the International Space Station, the James Webb Space Telescope, and the Artemis program. Prior to joining NASA, Garvey studied economic policy and language in Vietnam through the Boren Fellowship program, and before that he spent 4 years in Nagasaki, Japan as a English Teacher. He received his graduate degree from the Monterey Institute of International Studies in California and his undergraduate degree from Northeastern University in Boston, Massachusetts.
